📍 #699, JP Nagar, Mysuru.

Technical & Professional Skills

- SIEM: FortiSIEM, Splunk, ArcSight, ELK
- Threat Hunting: Hypothesis-driven hunting, log correlation, detection use-cases
- EDR: SentinelOne, Elastic Defend
- Network Analysis: Wireshark, Zeek, Brim, NetworkMiner (TCP/IP, DNS, HTTP)
- Email Security: FortiMail, Symantec Mail Security
- SOAR: Cortex XSOAR
- DFIR: Autopsy, KAPE | Memory: Volatility, Redline, Velociraptor
- Vulnerability Assessment: Nessus
- OSINT & Threat Intel: Domain/IP analysis, email tracing
- GRC & OS: ISO 27001 | Linux, Windows
- Security: CTF, phishing & social engineering
- Soft Skills: Leadership, teamwork

GitHub & Write-Ups

- GitHub: <https://github.com/KdMenon007> | Hands-on security labs, automation, and tooling
- Medium: <https://medium.com/@kiranmenon16> | In-depth write-ups on THM, HTB, CTFs, and real-world attack techniques

Certifications

- Splunk Fundamentals
- SentinelOne Partner Certification (101 & 201)
- Palo Alto Network Security Engineer Specialist
- Certified Ethical Hacker (CEH v10)
- Certified Network Security Specialist (CNSS)
- Cisco Introduction to Cyber Security
- Security Quizzes & Challenges (Telangana State Police, Forensics Quiz, etc.)

About Me

SOC Analyst with 3.4 years of experience in security monitoring, incident response, and real-time threat detection at Securado. Skilled in alert investigation, threat hunting, and handling incidents end-to-end across SIEM, EDR, and network layers. Experienced in malware analysis, phishing investigations, and host-level response. Focused on improving detection use cases and reducing false positives through log analysis and correlation. Strong understanding of attacker techniques and mapping threats to frameworks like MITRE Attack. Actively building skills through TryHackMe and Hack The Box, with working knowledge of ISO 27001 practices.

Professional Experience

Securado Pvt Ltd – Muscat, Oman | SOC Analyst

Feb 2021 – May 2024

Key responsibilities:

- Monitored and investigated security alerts using FortiSIEM and ArcSight, making sure critical issues were picked up and escalated on time.
- Handled incidents end-to-end, from initial triage to containment, remediation, and recovery.
- Worked on threat hunting across FortiSIEM, Splunk, and Elastic, helping identify hidden threats and mapping them to MITRE Attack.
- Built and improved detection rules, and correlated logs across endpoint, network, and email sources to reduce false positives and improve visibility.
- Used threat intelligence and OSINT during investigations to add more context and support proactive detection.
- Documented investigation steps, playbooks, and incident findings so the team could reuse and improve processes.
- Worked closely with IT and network teams during incidents to make sure issues were contained and resolved properly.
- Analyzed malware using SentinelOne and Elastic Defend, focusing on understanding behavior and improving detection.
- Investigated phishing and malware emails, including header and payload analysis, and helped with remediation.
- Performed host-level investigations, including root cause analysis, system cleanup, reimaging, and basic forensic analysis.
- Collaborated with the Red Team during Nessus assessments to validate findings and fix vulnerabilities.
- Automated some routine SOC tasks using XOAR, and supported ISO 27001 activities along with SOC reporting.

Education

PES College of Engineering – Mandya | Master of Computer Applications (9.1 CGPA)

2016 – 2019
